

MYOPCY-MET Tablet

Support for PCOS, Hormonal Balance & Insulin Sensitivity

Regulate cycles. Balance hormones. Improve metabolic health.

Product Introduction

MYOPCY-MET Tablet is a scientifically formulated combination therapy designed to help manage Polycystic Ovarian Syndrome (PCOS). By regulating ovulation and improving insulin sensitivity, it supports hormonal balance, restores menstrual regularity, and promotes reproductive and metabolic well-being.

Active Ingredients & Their Roles

Myo-Inositol (550 mg)

- Restores ovarian function and ovulatory cycles
- Improves insulin sensitivity and hormone balance

D-Chiro Inositol (13.8 mg)

- Enhances metabolic and reproductive health
- Works synergistically with Myo-Inositol to reduce androgen levels

Metformin HCl (500 mg)

- Reduces insulin resistance
- Lowers blood sugar levels and aids weight management

L-Methyl Folate (500 mcg)

- Supports follicular development and cell division
- Reduces the risk of neural tube defects in women of reproductive age

Methylcobalamin (750 mcg)

- Aids in red blood cell production and nerve function
- Supports energy metabolism and reduces fatigue

Benefits of MYOPCY-MET in PCOS

- Regulates menstrual cycles and ovulation

- Improves fertility potential in women with PCOS
- Enhances insulin sensitivity and metabolic profile
- Reduces acne, hirsutism (excessive hair growth), and other androgen-related symptoms

Side Effects

MYOPCY-MET is generally well tolerated. Mild side effects may include:

- Nausea
- Vomiting
- Diarrhea
- Abdominal pain
- Reduced appetite
- Altered taste sensation
- Hypoglycemia (low blood sugar, especially if not taken with food)

These symptoms are typically short-lived. If they persist or worsen, consult your doctor.

Precautions & Safety Measures

- Inform your doctor of any liver, kidney, or heart conditions prior to use
- Pregnant or breastfeeding individuals should seek medical advice before taking this medication
- Alcohol should be limited, as it may increase side effect risk
- Kidney function tests may be recommended before starting therapy

What if You Miss a Dose?

Take the missed dose as soon as you remember. If your next dose is near, skip the missed one and resume your regular schedule. Do not double the dose to compensate.
